

About InCyT

Interdisciplinary Cyber Training (InCyT) is a project funded by the European Commission under the Erasmus + program. The Erasmus program is aimed at building relationships between industry and education providers.

Motivation:

The digital economy is primarily based on data. In the age of Industry 4.0, cyber-physical systems and the Internet of Things, more and more products and processes are being digitized. Cyber security, i.e., the protection of this data and the associated information processing systems, is more relevant today than ever before in economic history.

The aim of the Erasmus+ Interdisciplinary Cyber Training (InCyT) project is first to develop a cybersecurity competency framework that companies can use to describe and improve competencies and skills in order to develop a company's Cybersecurity strategy and avoid cyber-attacks and VET to improve their education plans.

The Project Outputs

- a digitally supported interdisciplinary cyber security learning program for SMEs employees,
- a mentoring program for SMEs employees,
- an interactive digital platform for learning and SMEs cooperation,
- methodology to adapt the cybersecurity training program for VET and a European transferability model.

The Platform

Join for free our training platform and find interesting cyber security courses available in: Dansk (da), Deutsch (de), English (en), Italiano (it), Polski (pl), Română (ro), Türkçe (tr) languages.
